

Bacillus subtilis DNA Standard

Cat. No.: LBGF-0125-GF2

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	Microbial DNA standard from <i>Bacillus subtilis</i> .
Target	<i>Bacillus</i> DNA Standard
Derived From	<i>Bacillus subtilis</i>
Product Type	Nucleic acid
Specification	≥10 ng/μL
Volume	30 μL/vial
Pack Size	0.3 μg
Risk Group	1
Product Format	Frozen
Storage	-20°C or colder
Applications	1. Quantitative research and analysis. 2. Assay development, verification, and validation. 3. Laboratory quality control. 4. Suitable for quantitative standard for PCR, sequencing and NGS.
Handling Procedure	1. Thaw the vial at room temperature and immediately place it on ice. Avoid multiple freeze-thaw cycles as this may lead to DNA degradation.

2. Gently mix the sample to ensure that the material is evenly distributed.
3. Before opening the tube, briefly centrifuge to ensure that all the liquid is at the bottom.

Introduction

Quantitative genomic DNA from *Bacillus subtilis*.

Alternative Names

Bacillus subtilis; DNA; Quantitative.
